Building an **anti-racist** environment

UCU

University and College Union

THE HOSTILE ENVIRONMENT

The *hostile environment* pursued by successive governments is impacting on workers across all sectors of society including anyone who, through no fault of their own, does not have the required paperwork. Even if someone has been living an organised, tax-paying life here in the UK for many years they can still fall victim to an over-zealous bureaucracy.

The *hostile environment* extends to the treatment of international staff and students in terms of visa applications. Staff are faced with a visa processing system which is protracted, expensive and unpredictable.

Challenge the *hostile environment*.
