Sent: Tue 13/02/2007

To: Vice-chancellor/Principal

Subject: University privatisation - an open letter from UCU members to vice-chancellors and principals

Dear vice-chancellor/principal,

I am writing to provide you with a copy of an open letter to all vice-chancellors and principals from UCU members setting out UCU's opposition to increasing levels of private sector involvement in the provision of academic and other key university functions. We are concerned that, in common with experience across the rest of the public sector, the increasing involvement of private sector providers threatens both the quality of services and the pay and terms and conditions of staff.

As you know, I have raised our concerns with UUK and with UCEA through the JNCHES machinery, where our position was supported by all the unions representing university staff. You should be in no doubt that the academic community is overwhelmingly opposed to further privatisation. In just over a week nearly 4,500 staff have signed the open letter and more are signing every day.

I will be sending you a paper copy of both the open letter and the signatures so far this week and I would be grateful for a reply confirming that your university will not seek to privatise or contract out any aspect of the running of any academic department or key support function

Yours

Sally Hunt  
Joint general secretary, UCU

## **An open letter to vice-chancellors and principals from UCU members**

We are writing to you to let you know of UCU's opposition to increasing levels of private sector involvement in the provision of academic and other key university functions. We are particularly concerned that companies such as Study Group International, KAPLAN and INTO have been in extensive discussion with some UK universities with the aim taking over the provision of courses in IT, vocational training and language teaching for - in particular overseas students.

Our concern is at the possible negative impact of these ventures upon the quality of education provided and also the impact on the terms and conditions of the staff where private provision replaces that of the institution itself. The international market is of crucial importance to UK universities. It seems to us that handing responsibility for providing and preparing overseas students to the private sector is dangerous. In addition to the concerns about quality and the conditions of the staff, what happens if and when a private provider decides that this 'market' is not profitable enough? We find it difficult to understand why you would not want to control your own destiny in this area.

The proliferation of interest from private firms in higher education raises other issues too which go much wider than the provision of language courses for overseas students. We are also concerned about the effect of being transferred to a private company on the future pay, pensions, workloads, job security and even academic freedom of staff.

For these reasons, UCU is campaigning vigorously against the privatisation of higher education. We will resist attempts to transfer academic departments and staff into private ownership and will defend our members' terms and conditions, including pension rights, as well as the quality of students' education. Please confirm that your university will not seek to privatise or contract out any aspect of the running of any academic department or key support function.

Signed by:
