

UCU Environment Conference 2010

Sustainable development

Making our voice heard

Thursday 18 November 2010, 10.30 – 16.30, UCU HQ, Carlow Street, London NW1

Trade unions have got a major stake in promoting a low carbon economy. This conference provides us with the chance to develop our capacity at:

Sector level

UCU has identified three key areas where we need to make a difference on the environment – campus, curriculum and community. Is your branch up to the challenge?

National level

We need to influence the national debate. The coalition government claimed it will be the 'greenest government ever'. Six months down the line have they kept their pledge?

International level

After the failure of Copenhagen how will the international community meet the challenge of climate change at the Cancun conference?

Join us on 18 November 2010

Register online at: <https://asp.artegis.com/servlet/asm/>
