**PSC trade union conference**

**T**his key trade union conference for delegates from trade unions affiliated to the PSC will discuss how to take forward union campaigning on Palestine, and how to implement the policy endorsed by TUC Congress most recently in 2011.

Speakers from Palestine and the trade union and solidarity movement in Britain, together with specialist strands focusing on discussion and proposals for particular areas of work – from targeting complicit firms and ending the arms trade, to building the campaign within unions at local and national level – make this a vital conference for union branches and regions affiliated to the PSC.

The conference will promote discussion on how we increase solidarity nationally, regionally and locally and how trade unions can help build the mass movement.

If your trade union, branch or region is affiliated to the PSC, please ensure that they send delegates to this conference.

Please register your delegate to the PSC trade union conference:
